

**PSY 335: EXPERIENTIAL CLASS #2**

First name: \_\_\_\_\_ Last name: \_\_\_\_\_

**This exercise is based 200 years from now in an *ideal* future society that you would like to live in.**

Spend 5 minutes imagining what that ideal society is like. Think about this in terms of values. What values are most represented and demonstrated in this society? What are the foundational beliefs and values that underpin this society?

Now think about *how* these values and beliefs are demonstrated? (If you're a bit stuck, think about different places you have been and how the 'feel' of the place is different.) Now think in terms of your ideal society. Exactly how are people treating each other? the environment? What do people say? do?

In schools? In communities? In cities? What kinds of laws or government are there? What do the cities and communities look like? What about the environment? How is education structured? Health care? What about aspects of life such as leisure time, work lives, family life? Volunteer groups?

Spend the next 15 minutes writing your response in **DETAIL**. Use up both sides of the sheet up to the line at the bottom on the other side of the sheet. Use **THE WHOLE** 15 minutes.
